

Specialization

PHMSA/USDOT Hazardous Material Regulations

USEPA (and State) hazardous waste management regulations

IATA Dangerous Goods Regulations

IMO Dangerous Goods Code

Positions held

Daniels Training Services

November 2010 to Present
Training Services Provider

My current business is the culmination of 20+ years of experience in the EHS and transportation industries.

Fehr-Graham and Associates

February 1998 to November 2010
Project Environmental Scientist

Here I gained valuable knowledge across the entire range of environmental regulations and applied that knowledge to FGA's customers.

Laidlaw Environmental Services

December 1992 to December 1997
Field Chemist/Driver, Consolidation Supervisor

In this position I routinely performed the regulated activities that my training and consulting now addresses.

Education

B.S., Natural Resource Management, University of Wisconsin-Stevens Point, 1991

I think the best way to describe me and my business is this: I feel that I am finally in the place where God wants me to be and becoming the person I am meant to be. I'm grateful to live in a country where an average person like me can, through hard work and perseverance, accomplish extraordinary things. I love my work. I enjoy answering people's questions. I feel great satisfaction when I can be the solution to someone's problem. Let me help you too!

What I can do:

- HazMat Employee training per 49 CFR 172.704 of the USDOT.
- Hazardous Waste Personnel training for a large quantity generator per 40 CFR 265.16 of the USEPA and state regulations.
- Hazardous Waste Personnel training for a small quantity generator per 40 CFR 262.34(d)(5)(iii) of the USEPA and state regulations.
- Training for shippers and packers of dangerous goods by air per 1.5.0 of the IATA DGR.
- Training for shore-based personnel as shippers of dangerous goods by vessel per 1.3 of the IMDG Code.
- Consulting services on all of the above.

How I do it:

- "Public Webinars" are scheduled monthly and are open to any who register. They are meant to provide a general overview of the regulations. Currently I only offer HazMat Employee training and Hazardous Waste Personnel training in this manner.
- "Site Webinars" can be scheduled at the convenience of a customer. These are in-depth and site-specific. Any of my training services can be provided in this manner.
- "Onsite Training" is the most site-specific and in-depth of my training options. It includes time before the scheduled training to work with the customer to create a training presentation and test specific to their operations and the applicable regulations.
- My consulting services can be provided either remotely or on-site. For customers who require more than training.
- I'm also happy to answer the questions of anyone who contacts me – at no charge.

Where I do it:

- Anywhere.
